Homeless survive winter: Now what?

NOMADIC SHELTER PROGRAM CLOSSES

By CHRISTINA HOWARD
Staff Writer

Organizers of Sacramento's first "nomadic" winter shelter program disbanded it a month Tuesday and began soliciting donations and volunteers for next year.

What's Next?

Many of those who sleep and eat in shelters during cold winter months will return to the outdoors, living unsheltered less consistently, asking organizations and trying to find shelter from police and park rangers.

Despite more than a year of protests, appeals and negotiations, the effort to establish a legal place for homeless people to sleep in Sacramento remains stalled in controversy.

Homicide victims rarely talk to police

Most homicide victims do not talk to police before being pronounced dead, a study by researchers at the University of Toronto found. The researchers interviewed 100 homicide victims' families and found that only 10 percent of them had spoken to police before the victim was killed. The researchers also found that many families were not aware of the police's role in homicide investigations.

Cow urine makes for juicy lemons

By R. Sittampalam
KILA: Earthworms and cow urine have helped a farmer here grow juicy and bigger lemons. T. Kallippan, 57, who used to harvest ping-pong ball-sized lemons on his cow-urea orchard, is now reaping fruits that are bigger than hockey balls. The orchard sets into RONGG a month while the earthworms fertilize the soil. The farmer has also opened him to set up a vermiculture (earthworm breeding) facility on a two-hectare plot at the plantation where he produces 50kg of earthworms each per month that he uses as fertilizer.

Worker suffers leg pain after crane drops 800-pound ball on his head

CHARLESTON (AP) — The state Division of Highways granted contracts to a contractor to repair damage to a highway. He said he has trouble walking and suffers leg pains.

Bridges help people cross rivers

By MICHELLE DUNAVEN

Have you ever considered what Rockford would be like without bridges across the Rock River? How would we get from east to west? Ferris might be an answer, but not a very practical one.

Bridges have helped mankind traverse waterways, crevasses and the like for hundreds and even thousands of years. And, throughout that time, bridges have evolved from a simple fallen log across a narrow creek to highly complex roadways spanning miles of shallow waterways, such as the 24-mile-long Lake Pontchartraine Causeway near New Orleans, La.

To Do:

The next time your family visits Discovery Center Museum, try to find the two different arch bridges and one suspension bridge in Rock River Discovery Park. If you want to learn how engineers build bridges and buildings, you might want to participate in our upcoming Exploring Architecture Camp, from 9 a.m. to noon Wednesday, July 29, through Friday, July 31. Open to children ages 8 to 11, the camp will explore engineering and architecture with books,

earthquake table. Call Discovery Center Museum at 903-6700 for admission fees and registration information.

To build your own bridge or building at home, you will need:
 ■ Popsicle sticks
 ■ Gum drops
 By joining the popsicle sticks in the gum drops, you can connect them together to create your own structure. How high can you make a tower reach? How long of a span can you give to a bridge?

Man Accused of Killing Lawyer Receives a New Attorney

By Scott Slavenski
WIN Staff Writer

Charged in the murder of his former attorney, Miguel Trujillo has been appointed another attorney from the public defender's office.

July 2004, from the Public Defender's Department in Albuquerque, had no comment, saying that she had just been given the case with no time to review it.

Trujillo had recently rejected his previous court-appointed attorney of six months, Marc Rubin.

An attorney from out of dis-

trict was hired because most of the attorneys working for it Public Defender's Department out of Santa Fe knew Carlos Vigil, the man Trujillo is accused of murdering in a drive-by shooting.

Vigil was murdered Aug. 13, 1999, a few blocks from his South Street office while walking to District Court for a hearing.

A five-page, early model food pickup was spotted in the area linking Trujillo to the scene. Antoinette Thibault, Attorney Richard Salazar said the crew was waiting for an attorney to represent Trujillo to be found to

schedule the next hearing.

All Five District Court judges were disqualified from the hearings, with Judge Stephen Miller excused. The Supreme Court appointed Second District Court Judge Neil Chodoff from Albuquerque to oversee the hearings.

Trujillo is accused of an open charge of murder, two counts of executing a witness or witness, one charge of tampering with evidence, and one charge of being a felon in possession of a firearm.

Trujillo pled not guilty. He faces up to 99 years in prison.

Puerto Rican teen named mistress of the universe

The Associated Press

Los Angeles — An 18-year-old modeling actress from Puerto Rico, who hopes to someday star in U.S. and Latin American films, was crowned last night as Miss Universe 2004.

Juliyia Echevarria Mendez of Puerto Rico shared a nervous emotional hug with first runner-up Karara Chikava of Japan moments before the winner was announced. She clapped her hands to her mouth in amazement as she heard her name called. She beamed on the crown was placed on her head.

Miss USA Tara Conner was the contest's fourth

runner of Switzerland and third runner-up Lourdes Arcelay of Paraguay.

Career was young to become the first U.S. winner since Erna Lee in 1951. The Kentucky native wore a red, white and blue jockey suit and cracked a whip during the opening parade of the contest. Several of the contestants sported costumes including colorful sashes, sequins, fur, massive bustpieces and, in the case of Miss Japan, a Japanese sword.

"They were probably afraid not to pick Miss Japan or she would lose that sword," quipped Carlos Krensky of TV's "Queer Eye," who presided commentary along with

Victoria Ginie and Latin singer Chela provided musical performances.

The top 10 finalists' names were announced early in the show. Then their scores were disclosed and competition began again, with the field gradually narrowed throughout the night.

After being narrowed to the final 10, the competition moved to evening gown, while ending contestants walking across the stage to music provided by Ginie.

The winner travels the world for a year on behalf of charities and pageant sponsors. Natalie Gelvez of Canada crowned Mendez at the end of the two-hour telecast which began at 8 p.m.

Man with 8 DUIs blames drinking problem

By Dan Bricker

It's not just the man's eight DUI convictions, but the fact that he has a drinking problem that has led to the man's arrest. The man, who has been arrested eight times for DUI, says he has a drinking problem that has led to his arrests. He says he has been drinking since he was a child and that he has tried to quit several times, but he has never been able to do so. He says he has a drinking problem that has led to his arrests and that he is looking for help.

Miracle cure kills fifth patient

By The Associated Press

A fifth volunteer died Tuesday from an experimental drug touted as a miracle cure for hepatitis B, beyond medical rescue even as scientists unraveled the mystery of what went gravely wrong in a clinical trial.

Amazingly, the first clue was in plain sight a year ago, but researchers at the National Institutes of Health didn't know enough about how the drug worked to recognize what it meant, the study's lead scientist says.

"Something terrible happened and we missed it," Dr. Jay Hoofnagle said in an emotional

interview describing the horror of realizing the drug was killing people months after they stopped taking it.

"The dreadful thing [is] waiting to see what will happen," he said, his voice trembling, before learning of the most recent death. "I just hope we're over the worst."

The drug Fialuridine, or FIAU, had shown great promise for fighting the hepatitis B virus, which can cause deadly cirrhosis and liver cancer. When dogs passed toxicity tests unharmed, the Food and Drug Administration approved FIAU for human trials.

Too late, scientists would discover that in humans, FIAU stealthily attacks the very building blocks of cells in livers, kidneys and nerves.

Five people treated with FIAU have died of liver and kidney failure, despite liver transplants for three of them. On Tuesday, a 57-year-old woman succumbed after two months in critical condition and two liver transplants at the University of Virginia Medical Center. One volunteer remains in serious condition there, and another is recovering from an Aug. 4 transplant at Emory University Hospital in Atlanta.
